

# Offer of sale of specialized vehicles for the collection and transport of raw materials of animal origin, so-called - animal by-products

July 2024

## 1. Mercedes Benz ACTROS 2536L

standard: EEV

year of production 2011

mileage: 766,000 km

drive: 6x2 - third lifting axle,

steering gearbox: automatic

engine capacity: 11946 cm<sup>3</sup>

power: 360 HP

GVW: 26000 kg / empty weight: 13880 kg.

**Description:** The vehicle and body in very good technical condition. (1 owner). Two-chamber tight body divided in the ratio of 1/3 to 2/3 of the volume, with the possibility of dismantling the partition wall, which will create one large, capacious chamber. Body of the German company Kopf made of high-quality stainless steel (acid-resistant). Equipped with complete, 100% efficient hydraulics. Loading is done from the top through a two-part, hydraulically controlled sliding roof. Unloading is done by gravity through a lifting tipper. The body allows loading from containers. It is possible to use standard containers from 60 liters to 1100 liters and larger non-standard ones. Loading system with a lifting capacity of 1500 kg controlled manually and wirelessly.

**Net price offer:        EUR 56300,00 - VAT invoice**

## **2. Mercedes Benz AXOR 1829L**

standard: Euro 4

year of production 2007

mileage: 702,000 km drive: 4x2

gearbox: manual

engine capacity: 6374 cm<sup>3</sup>

power: 290 HP

GVW: 18,000 kg / empty weight: 10,080 kg.

**Description:** The car and bodywork are in very good technical condition. (1 owner). Two-chamber, tight bodywork divided in the ratio of 1/3 to 2/3 of the volume, with the possibility

of dismantling the partition wall, which will create one large, capacious chamber. Bodywork by the German company Loosen made of high-quality stainless steel (acid-resistant). Equipped with complete, 100% efficient hydraulics with a hydraulic winch mounted under the rear bumper, which makes loading large animal carcasses much easier. Loading is done from the top through three large, independent roof flaps controlled hydraulically. Unloading is done by gravity through a lifting tipper. The bodywork allows for loading loosely, as well as from containers. It is possible to use standard containers from 60 liters to 1100 liters and larger non-standard ones. Loading system with a lifting capacity of 1500 kg controlled manually.

**Net price offer: EUR 46900,00 - VAT invoice**

### **3. Mercedes Benz AXOR 1828**

standard: Euro 3 - without AdBlue

year of manufacture 2006

mileage: 885,000 km

drive: 4x2

gearbox: manual engine

capacity: 6374 cm<sup>3</sup>

power: 280 HP

GVW: 18,000 kg / empty weight: 10,080 kg.

**Description:** The car and body in very good technical condition. (1 owner). Single-chamber tight body. Body by the German company Loosen made of high-quality stainless steel (acid-resistant). Equipped with complete, 100% efficient hydraulics. Loading is done from above through a two-part sliding roof controlled hydraulically (the front part is fixed, the rear part is sliding). Unloading is done by gravity through a lifting tipper. The bodywork allows for loading loosely, as well as from containers. It is possible to use standard containers from 60 liters to 1100 liters and larger non-standard ones. Loading system with a lifting capacity of 1500 kg controlled manually and with a wired remote control.

**Net price offer : EUR 46900,00 - VAT invoice**
